

UPDATE TO CA-620 DISCONTINUATION
November 10,2020

This is an update to our announcement about the discontinuation of support for the Medonic CA-620 that was sent out on September 1, 2020.

As stated previously, we will no longer provide reagents for the Medonic CA620 after December 31, 2020. We will, however, continue to provide service support, assayed controls and calibrator material through June 30, 2021 for that unit. This is due to the shelf life of the reagents that might be manufactured and/or purchased by the end of this year. Customers who are in that category will be able to still utilize those reagents and be able to run controls/cals through June 30, 2021.
